## LAUNDRY & FABRIC CARE

### PEGASUS - LAUNDRY DETERGENT

High Performance Laundry Detergent for Retail and On Premise Laundries

Pegasus - laundry detergent is a fully built synthetic detergent powder especially designed for use in the retail sector and in on premise laundries. The high performance non ionic detergent contains water softening agents, optical brightening agents and a high temperature dry powder bleach based on the peroxy compounds. Pegasus - laundry detergent is therefore excellent for washing a wide range of soiling and soiling levels whilst still being easy and safe to use. The bleaching agent is effective above 60° C (140 ° F), where it can remove stubborn staining from white and pastel shaded work, but below that temperature its action is mild enough not to adversely affect colored or delicate work. Since Pegasus - laundry detergent contains water softening agents, it can work equally well in hard or soft water. Foam control agents make correct dosage easy by visual attention to adequate lather levels. Available in biological and non biological formulations.

**Pack Size :**

18 Kg or  
25 Kg

- Out performed retail brands in controlled testing
- Exceptional stain removal properties
- Work Well in hard or soft water
- Simple and safe for untrained staff
- Added softener, free flowing and pleasantly perfumed

### PEGASUS - LAUNDRY DETERGENT

Alkali booster

Pegasus - laundry detergent Alkali booster is a concentrated blend of inorganic alkalis, anti re-deposition agents and optical brightening agents. Pegasus - laundry detergent Alkali booster is instantly ready to use for either adding to a washing system together with a surfactant or as a means of introducing more alkali into a washing system. Pegasus laundry detergent Alkali booster is compatible with all commonly used surfactants and is based on sodium met silicate.

**Pack Size :**

25 Kg

- Ready source of Alkali
- Quickly dissolves
- Superior soil remover
- Excellent color retention
- Allows full flexibility with choice and amount of surfactant

### PEGASUS - LAUNDRY DETERGENT

Concentrated Alkali booster

Pegasus - Concentrated Alkali booster provides a balanced blend of non caustic laundry alkalis to boost the removal of heavy greasy and ingrained soiling. The high performance formulation contains sequesterant and suspension agents which prevent metal and mineral contaminants in the water supply from affecting wash quality. Pegasus - Concentrated Alkali booster will help to maintain a bright whiteness on cotton and polyester items when used on the hot wash and can be used as a soaking agent with Pegasus Glacier to remove the stains (e.g. mildew) and revive lost whiteness. Pegasus - Concentrated Alkali booster contains no detergents and will not cause excessive foaming in the washing machine.

**Pack Size :**

25 Kg

- Ready source of concentrated alkali
- Quickly dissolves
- Provides good soil remover and good color retention
- Allows full flexibility with choice and amount of surfactants
- Cost-effective in use

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS - STARCH POWDER

Economical Starch Blend for a Professional Finish in Table Linen and Garments

Pegasus Starch Powder is a high performance blend of wheat and maize starch. The combination of maize and wheat starch grains each give different properties. Maize with the largest grain size of the two, gives a stiff cardboard like finish, whilst wheat, with a grain size between that of maize and rice gives a stiff but pliable finish. Pegasus starch powder can be added as a dry feed product or 'creamed' in a bucket prior to use, or made up into stock solutions for use on colored or delicate goods (150g/l or 1.5 oz/gallon).

Please note that stock solutions must be either agitated continuously or re-mixed prior to each application.

**Pack Size :**  
25 Kg

- Outstanding value
- Blended formulation
- Eliminates creasing of table linen
- Professional results
- Suitable for table linen and garments

### PEGASUS POWERFUL OXYGEN DE-STAINER

Pegasus is a highly active oxidizing and bleaching agent based on the sodium peroxy compounds. In powder form, it provides an easy-to-use source of active peroxy compound to provide high levels of stain removal and color retention on white work. On colored work, it provides a means of removing bleachable stains not treatable with chlorine-based bleaches. Thus it is ideal for the treatment of stained colored table linen (polyester, polyester/cotton, cotton or linen). It is also particularly suited to the removal of mildew from fabrics, either by normal in-the-wash treatment during the hot stage of the wash, or by soaking treatment in a cold bath. Either method provides a means of removing mildew without unduly attacking the fabric. Pegasus does not contain optical brightening agents (OBA) so it can be used on colored work without fear of problems caused by OBA absorption onto colored articles.

**Pack Size :**  
25 Kg

- Improves color through removal of background staining
- Dyestuffs are less affected than with chlorine-based bleaches
- Less harmful on fabrics than chlorine-based bleaches
- Old or unfit stock can be recovered
- Free of optical brightening agents

### PEGASUS – BACT - LAUNDRY DETERGENT

Bacterial Detergent for use in Hospital and Commercial Laundries.

Pegasus Bact-Laundry Detergent is liquid bactericidal detergent designed for use in hospital and commercial laundries. Although it can be used as the main source of detergency in a wash process it is usually applied as a last rinse additive. The high performance formulation contains an effective biocide which makes it suitable for use on fabrics which may not be thermally disinfected. The unique solution is safe on colored or delicate goods and is particularly effective at removing residual odors.

**Pack Size :**  
25 Litres

- Contains no effective biocide
- Can be used on fabrics which may not be thermally disinfected
- Safe on colored or delicate goods
- Removes residual odors
- Easy to use

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS - LIQUID OXYGEN BLEACH

Hydrogen Peroxide Stain Remover for White or Colored Work

Pegasus - Liquid Oxygen Bleach is a concentrated solution of hydrogen peroxide oxidising agent provides high levels of stain removal and colour retention on white work. On coloured work, Pegasus - Liquid Oxygen Bleach can be used safely to remove bleachable stains which could not be treated with chlorine based bleaches because of the risk of colour removal from the original dyestuff. The unique formulation can also be an effective treatment for mildew on white or coloured work, either during the hot stage of the wash or by cold soaking in a bath or washing machine overnight. The use of Pegasus - Liquid Oxygen Bleach for this treatment, particularly the cold bath treatment, is less aggressive on the fabric and/or dyestuff used. Since Pegasus - Liquid Oxygen Bleach does not contain optical brightening agents (OBA) it can be used on coloured work without fear of absorption of the OBA giving rise to colour changes on the fabric.

**Pack Size :**  
25 Litres

- Concentrated source of liquid oxidising agent
- Contains hydrogen peroxide
- Dyestuffs less affected than with chlorine based bleaches
- Free of optical brightening agent
- Convenient for 'hands-off' pump injection

### PEGASUS RUST SOUR REMOVING POWDER

Pegasus - Rust Sour Removing Powder is an easily dissolved white powder which effectively inhibits discolouration of linen caused by iron in the water supply. The high performance formulation is an effective neutraliser of alkaline detergent residues when used in the rinse stage of a laundry wash process. Pegasus - Rust Sour Removing Powder is supplied in a concentrated format allowing for economy in use and is safe to use on all fabrics.

**Pack Size :**  
25 Kg

- Controls discolouration caused by iron or residual alkali
- Ensure optimum whiteness on finished linen
- Reduces rewash levels saving water, heat and time
- Free flowing powder can be added manually to washing machine
- Dissolves quickly for instant effect

### PEGASUS - LAUNDRY SOUR AND ANTICHLOR

Effective Laundry Sour and Antichlor

Pegasus - Laundry Sour And Antichlor is a white free-flowing fine crystalline powder which is a highly effective combined sour and antichlor product for use in the last rinse of a wash process. Its acidic nature will neutralise any excess alkalinity present in the last rinse and its antichlor properties will neutralise any residual sodium hypochlorite bleach that may be present. This will prevent the yellowing of articles on presses and ironers (galling) due to residual alkali left in the work, and also prevent damage during tumbling created by residual sodium hypochlorite bleach left in the work.

**Pack Size :**  
25 Kg

- Neutralises excess alkalinity
- Eliminates the risk of galling
- Eliminates bleach damage during tumbling
- Convenient to add direct to the washing machine
- Can be made into stock solution

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS - LIQUID ALKALI BOOSTER

Pegasus - Liquid Alkali Booster is a liquid alkaline detergent booster containing a highly concentrated blend of inorganic alkalis. It is specifically formulated to aid detergency in the presence of heavy soiling. It is especially suitable for use with our liquid detergent concentrate Pegasus Select which, although fully built and capable of being used as a 'one-shot' system in the light to medium soil range, will effectively be boosted by the addition of Pegasus - Liquid Alkali Booster heavy soiling conditions. Pegasus - Liquid Alkali Booster is compatible with all conventional surfactants from the Pegasus - Laundry Detergent range. Being a liquid concentrate Pegasus - Liquid Alkali Booster is specially suited for automatic injection such as peristaltic pumping systems where a very accurate dose is automatically injected into the washing machine at precisely the right time and the risk of human error is eliminated. Such a 'hands-off' system prevents wastage and produces optimum results time after time. In this respect it is ideal for use on continuous batch washing machines because of the ease of automatic injection direct from the container. Pegasus - Liquid Alkali Booster may also be added normally to the washing machine and because of its high concentration of active ingredients Pegasus - Liquid Alkali Booster will be extremely economical in use.

**Pack Size :**  
25 Litres or  
200 Litres

- Highly concentrated liquid alkali
- Ideal for boosting liquid surfactant concentrates
- Aids removal of heavy soil
- Can be used with automatic injection equipment
- Concentrated blend of inorganic alkalis

### PEGASUS BLEACHING POWDER FOR WHITE LINEN

Pegasus - Laundry Detergent is a high performance bleaching powder which removes or de-colourises staining matter that has not been removed by the detergency process. The sophisticated formulation is safe to use on virtually all classifications capable of being washed at high temperatures (not suitable for use on delicate fabrics, dark colours or woollens). Pegasus - Laundry Detergent is a convenient powder alternative to sodium hypochlorite bleach as it has a much longer shelf life - up to six months in cool, dry conditions and unlike sodium hypochlorite solution. Pegasus - Laundry Detergent ensures a controlled release of oxidising power at high temperatures as it can be safely added during the hot stage of the wash. Pegasus - Laundry Detergent can also be used as an alternative to liquid hydrogen peroxide or peroxy bleaching compounds.

**Pack Size :**  
25 Kg

- Removes or de-colourises staining matter
- Controlled release of oxidising power at high temperatures
- Contains 9% active chlorine
- Safer to use than sodium hypochlorite and has a longer shelf life
- Effective alternative to peroxy bleaching compounds

### PEGASUS SUPER CaLADOR FOR WHITE LINEN

Pegasus - Super Clador For White Linen bleach contains 16% active chlorine and is a sophisticated bleaching powder which is safe to use on virtually all classifications capable of being washed at high temperatures. (not suitable on delicate fabrics, dark colours or woollens). Pegasus - Super Clador For White Linen is a convenient powder alternative to sodium hypochlorite bleach as it has a much longer shelf life - up to six months in cool, dry conditions. Like sodium hypochlorite solution. Pegasus - Super Clador For White Linen is an oxidising agent which is capable of removing or de-colourising staining matter not removed by the detergency process. Pegasus - Super Clador For White Linen bleach retains all the advantages of chlorine-based bleach but can be safely added during the hot stage of the wash. This eliminates the risk of too quick a temperature rise if sodium hypochlorite is added at the start of a wash, and eliminates the need for additional rinsing when sodium hypochlorite is used on the first rinse. Pegasus - Super Clador For White Linen bleach can also be used as an alternative to liquid hydrogen peroxide or the peroxy powder bleaches.

**Pack Size :**  
25 Kg

- Super strength formulation containing 16% active chlorine
- Removes or de-colourises staining matter
- Controlled release of oxidising power at high temperature
- Safer to use than sodium hypochlorite and has a longer shelf life
- Effective alternative to peroxy bleaching compounds

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS - MILD ALKALINE DETERGENT

Low Temperature Mild Alkaline Detergent for Coloured, Delicate and Woollen Classifications

Pegasus - Mild Alkaline Detergent has high detergency and soil suspension properties coupled with low alkalinity making it excellent for washing coloured and delicate fabric at low temperatures. The high performance formulation is OBA free to avoid tainting of pastel shades and "pinking" reactions with chlorine bleach. Pegasus - Mild Alkaline Detergent is the ideal choice when a gentler wash is required at lower temperatures (40° C - 60° C) and can also be employed as a pre-wash product.

**Pack Size :**  
25 Kg

- Low alkali and high detergency for effective soil removal
- Safe to use on delicate fabrics, dark colours and woollens
- Excellent pre-wash product
- High water conditioning power when inconsistent wash water quality is a problem
- Economical in use

### PEGASUS - EMULSIFIER

Pegasus - Emulsifier is a specially formulated blend of non-ionic surfactants for use either on its own or as an adjunct to a built powder detergent. It does not contain hydrocarbon solvents or odour masking compounds. When added to the hottest part of a wash process (71° C or 160° F) or above, its ability to dissolve or emulsify food or mineral oils and greases is outstanding. Though effectiveness is good at all temperatures, for garment rental, we would recommend Pegasus - Emulsifier is used as an adjunct to our mainstream or polyester/cotton washing powders where the combination of alkalis, detergent builders, and surfactants with Pegasus - Emulsifier will give outstanding results on even the most abused garments or kitchen work. Because of the efficiency of this process it can be a substitute to dry cleaning the most heavily soiled articles. Alternatively Pegasus - Emulsifier can be used on its own as a convenient highly concentrated source of non-ionic surfactancy. Pegasus - Emulsifier is also effective on collar and cuff grease.

**Pack Size :**  
25 Litres  
200 Litres

- Efficient degreaser / emulsifier
- Removes animal, vegetable, mineral oils & fats
- Can eliminate the need to dry clean oily soiled fabrics
- Contains no hydrocarbon solvents
- Active across all temperature ranges

### PEGASUS HIGH PERFORMANCE EMULSIFIER

Pegasus - High Performance Emulsifier is a specially formulated blend of non-ionic surfactants for use either on its own or as an adjunct to a built powder detergent. It does not contain hydrocarbon solvents or odour masking compounds. When added to the hottest part of a wash process (71° C or 160° F) or above, its ability to dissolve or emulsify food or mineral oils and greases is outstanding. Because of this, Pegasus can remove the metal oxides and food residues at the same time as removing the oils and greases instead of leaving the residues behind as a difficult to move stain. For garment rental, we would recommend Pegasus as an adjunct to our mainstream of polyester/cotton washing powders where the combination of alkalis, detergent builders, and surfactants with Pegasus - High Performance Emulsifier will give outstanding results on even the most abused garments. Because of the efficiency of this process it can be a substitute to dry cleaning the most heavily soiled articles. Alternatively Pegasus - High Performance Emulsifier can be used on its own as a convenient highly concentrated source of non-ionic surfactancy.

**Pack Size :**  
4 x 5 Litres    200 Litres  
25 Litres       or 1000 Litres

- Very efficient degreaser / emulsifier
- Removes metal oxides and food residue stains
- Highly concentrated
- Can save the need to dry clean
- Contains no hydrocarbon solvents

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS RUST REMOVING SOUR LIQUID

Pegasus - Rust Removing Sour Liquid prevents iron contamination of textiles when applied to the last rinse of a wash process. This high performance formulation prevents the yellow/brown discolouration of fabrics caused by excess iron in the water supply. This dual action solution neutralises alkali residues from washing detergents thus preventing galling/yellowing of fabrics. Pegasus - Rust Removing Sour Liquid provides assurance of optimum consistency of finished work in variable water/rinse conditions. This unique solution can be used as a special treatment to remove rust marks from heavily contaminated batches of linen.

**Pack Size :**  
25 Litres  
200 Litres

- Cost effective solution to iron contamination
- Safe to use on all fabric types
- Combined action reduces rewash and improves whiteness
- Can be used as an iron inhibitor or as a concentrated special treatment for rust
- Can easily be applied manually or through automatic pumps

### PEGASUS RUST REMOVING SOUR POWDER

Pegasus - Rust Removing Sour Powder has been developed to remove iron from a contaminated water supply and from the fabrics being laundered. It is also an effective sour designed to prevent yellowing during finishing caused by residual alkalinity from the washing detergents. Pegasus - Rust Removing Sour Powder is readily soluble and can be used for all classifications of white and coloured work in commercial and institutional laundries.

**Pack Size :**  
25 Kg

- Removes background yellowness caused by iron in water
- Removes rust stains and reduces re-wash
- Inhibits scaling in washing machine
- Neutralises residual wash alkalinity
- Prevents galling

### PEGASUS - MEDIUM TO LOW ALKALI MAIN WASH DETERGENT

Pegasus - Medium To Low Alkali Main Wash Detergent is a fully built alkaline mainstream detergent which is capable of washing a very wide range of fabrics and successfully removing a wide range of soiling from these fabrics. It has a high level of alkalinity obtained from sodium merasilicate without the addition of caustic soda. The careful blend of non-ionic and anionic surfactants gives Pegasus - Medium To Low Alkali Main Wash Detergent very good detergency which is also boosted with sequestering agents, anti-re depositon agents and optical brightening agents. A special feature of Pegasus - Medium To Low Alkali Main Wash Detergent is the high level of soil suspending agents which boosts the detergency, particularly where low mechanical action is inherent in the system i.e. continuous batch tunnel washers.

**Pack Size :**  
25 Kg

- Simple to use
- Can wash virtually all classifications
- Contains no caustic soda
- Very cost effective
- Particularly suited to continuous batch washers

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS

#### ECONOMICAL MEDIUM TO LOW ALKALI MAIN WASH DETERGENT LIQUID

Pegasus - Economical Medium To Low Alkali Main Wash Detergent Liquid is a synthetic liquid detergent which can be used 'one shot' product for most classifications in the light to medium soiling range. For heavier soiling we would recommend that it be used with our liquid alkali builder Pegasus where the inorganic alkalis contained in Pegasus will aid heavy soil removal. Pegasus Select is ideal for use with direct injection equipment such as peristaltic pumps where a very accurate dose is automatically injected into the washing machine at precisely the right time and the risk of human error is eliminated. Such a 'hands-off' system prevents wastage, gives optimum results all the time and is safe to handle. Pegasus - Economical Medium To Low Alkali Main Wash Detergent Liquid may also be fed manually to washing machines and will perform equally well in hard or soft water conditions. Because of its high concentration of active material Pegasus - Economical Medium To Low Alkali Main Wash Detergent Liquid is extremely economical in use.

**Pack Size :**  
25 Litres  
200 Litres

- Concentrated liquid detergent
- Can be boosted with separate alkali for very heavy soiling
- Ideal for automatic injection direct from container
- Very economical in use
- Combines all the benefits of liquid concentrates in one product

### PEGASUS - LIQUID ANTICHLOR LAUNDRY SOUR

Pegasus - Liquid Antichlor Laundry Sour is a very effective sour and antichlor product for use in the last rinse of a wash process. Its acidic nature will neutralise any excess alkalinity present in the last rinse and its anti-chlor properties will neutralise any residual sodium hypochlorite bleach that may be present. This will prevent the yellowing of articles on presses and ironers (galling) due to residual alkali left in the work, and it will also prevent damage during tumbling created by residual sodium hypochlorite bleach left in the work. As a liquid it will be of particular advantage with continuous batch washers since last rinse contamination can often be a problem - Pegasus - Liquid Antichlor Laundry Sour solution can be automatically injected into the machine direct from the container using peristaltic pumping equipment thereby negating this problem. Another advantage of using Pegasus - Liquid Antichlor Laundry Sour is due to ultra high concentration of active matter it is extremely economical in use.

**Pack Size :**  
25 Litres  
200 Litres

- Highly concentrated sour/antichlor
- Supplied in convenient liquid form
- Can be used with automatic injection equipment
- Eliminates risk of galling
- Eliminates bleach damage during tumbling

### PEGASUS - LIQUID FABRIC CONDITIONER

Pegasus - Liquid Fabric Conditioner is a highly active cationic fabric conditioning agent which imparts a soft, fluffy handle to cottons, woollens and synthetic fabrics after each application. The high performance formulation contains fabric lubricating properties which reduces the wear on fabric and increases the efficiency of hydro-extraction this consequently reduces drying time and provides wrinkle-free fabrics with minimum static build-up after finishing. This pleasantly perfumed formulation can also be used on flat work to effectively reduce the labour in breaking up 'cheeses' after hydro-extraction. The cationic nature of Pegasus - Liquid Fabric Conditioner also allows bacteriostatic and fungistatic properties to inhibit re-growth of mildew making the formulation ideal for use on tea towels and table linen.

**Pack Size :**  
25 Litres

- Excellent fabric conditioning agent
- Lubricates flat work
- Keeps starch solutions fresh
- Help to inhibit mildew growth
- Gives pleasant fresh fragrance

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS - LOW FOAM DETERGENT

Medium to Low Alkali Main Wash Detergent for a Wide Range of Classifications

Pegasus - Low Foam Detergent is a fully built alkaline multi-purpose detergent capable of washing a wide range of classifications and soiling. Its caustic free build of alkalis combined with selected non-ionic and anionic surfactants make it specifically suitable for washing in the medium to high temperature range (60° C or 140° - 180° F) for general white work and fast coloureds. Pegasus - Low Foam Detergent has excellent anti-redeposition properties and with optical brightening agents added will give excellent colour retention to all classifications. Pegasus - Low Foam Detergent can also be effectively used at lower temperatures on coloured work.

**Pack Size :**  
25 Kg

- Easy to use
- Washes a wide range of classifications
- Can be used at all temperatures
- Can be dry fed or made into stock solution
- Gives quality results with good colour retention

### PEGASUS - DETERGENT PLUS

Boosted Medium to Low Alkali Main Wash Detergent for a Wide Range of Classifications

Pegasus - Detergent Plus is a complete detergent powder capable of washing a wide range of classifications and soilings. The high performance non caustic powder contains high levels of water conditioning agents to achieve the perfect wash chemistry with imperfect water conditions whilst the latest bleach-stable optical brightening agents produce sparkling results. Pegasus - Detergent Plus can be boosted with other Pegasus product even the worst possible soiling and staining.

**Pack Size :**  
25 Kg

- Top quality whiteness and brightness even on older linen
- Washes a wide range of classifications and soiling
- Can be used at all temperatures
- Chemically compensates for poor wash water and hardness over 60ppm
- Gives quality results with good colour retention

### PEGASUS - LOW FOAM DETERGENT

Laundry Detergent Powder for Wash Extractors or Batch Washers

Pegasus - Low Foam Detergent is a fully built synthetic detergent powder especially designed for use in wash extractors or batch washers. Based on non-ionic detergent, Pegasus - Low Foam Detergent also contains water softening agents and optical brightening agents. Pegasus is excellent for washing a wide range of soiling and soiling levels while still being easy and safe to use. The water softening agents ensure Pegasus - Low Foam Detergent works as well in softened water as it does in un-softened water whilst the foam control agents make correct dosage easy. Pegasus is suitable for use on high temperature classifications but is also safe to use on delicate temperature sensitive fabric.

**Pack Size :**  
25 Kg

- Suitable for use on high temperature classifications
- Safe to use on delicate temperature sensitive fabric
- High quality cost effective results with exceptional stain removal properties
- Simple and safe for untrained staff
- Low foaming laundry powder works well in hard or soft water

# PEGASUS

## LAUNDRY & FABRIC CARE

### PEGASUS - HIGH FOAM DETERGENT

High Alkali Main Wash Detergent with Special Soil Suspension Properties

Pegasus - High Foam Detergent is a high alkali main wash detergent. The high levels of alkalis present make the product especially suitable for handling heavily soiled classifications but it can also be used over a wide range of soiling and it is particularly economical in use when handling more lightly soiled work. The blend of non-ionic and anionic surfactants present, blended with sequestering agents, anti-redeposition agents and optical brightening agents make Pegasus - High Foam Detergent live up to its name. The high pH produced by Pegasus gives it very good saponifying powers on all types of mineral and vegetable greases, oils and fats. This makes the product suitable for washing industrial garments that might otherwise require dry cleaning.

**Pack Size :**  
25 Kg

- Very cost effective
- Works well over a wide range of soilings and fabrics
- Provides high pH for maximum soil removal
- Can be used as dry feed or made into Stock Solution
- Can provide an alternative to dry cleaning for industrial workwear

### PEGASUS - ENZYME DETERGENT

Main Wash Biological Detergent Suitable for Hospital and Catering Work

Pegasus - Enzyme Detergent is a fully built synthetic detergent containing unique proteolytic enzyme. A blend of non-ionic and anionic surfactants, sequestering agents, anti-redeposition agents, alkalis, optical brightening agents and a peroxy bleaching compound combine with enzymes to produce a very versatile product with exceptional stain removal capabilities. The properties of active ingredients present make Pegasus - Enzyme Detergent an ideal product for washing work from hospitals and the catering trade. Pegasus - Enzyme Detergent can also be used effectively as a pre-wash agent in conjunction with a Pegasus - laundry detergent or polyester/cotton wash powder or dissolved in an overnight soaking bath. This product can be used in hard or soft water conditions.

**Pack Size :**  
25 Kg

- Exceptional stain removal
- Specially suitable for hospital and catering trade work
- Safe and easy to use
- Can be used as a pre-wash or main wash product
- Good overnight soaking medium
